

SAGAR SHARMA

Dedicated and seasoned construction professional with over 10+ years of comprehensive experience in project management and construction technologies. Seeking a challenging role that leverages my expertise in overseeing complex projects, implementing cutting-edge construction technologies, and leading multidisciplinary teams. Eager to contribute strategic insights, technical proficiency, and client-centric solutions to drive the success of dynamic construction initiatives. Aiming to bring innovation, efficiency, and quality assurance to a forward-thinking organization committed to excellence in the construction industry.

AREAS OF EXPERTISE

Project Management

Construction Technologies

Leadership and Coordination

Client and Stakeholder Collaboration

Quality Assurance

Formwork Utilization

Risk Management

Value Engineering

Client Relationship Management

PROFILE SNAPSHOT

➤Adept in implementing cutting-edge construction technologies, specializing in areas such as partition walls, false ceilings, waterproofing, flooring, doors, and high-end finishing to deliver modern, functional, and aesthetically pleasing spaces.

➤Possess advanced technical skills in AutoCAD and Microsoft Office, complemented by expertise gained through specialized training in Six Sigma, 5S Methodology, and Value Engineering via the L&T Online Training Platform.

ADVANCED CONSTRUCTION TECHNOLOGIES

Partition Walls: Well-designed Gypsum board Drywall system by Saint Gobain.

False Ceiling: Aluminum framing with Gypsum boards, Aluminum panels, and Grid ceiling systems.

Waterproofing: Utilizing PU and Cementitious methods for toilets, and Crystalline waterproofing for water tanks.

Flooring: Expertise in Marble, Wooden, and Tileflooring applications

PARAS BUILDTECH WORK EXPERIENCE

Assistant Manager
(011.2024-Present)

Achievements/Tasks

- ❖ Support the project manager in contract administration, ensuring compliance with legal and organizational standards and addressing any disputes or variations.
- ❖ Coordinate communication between project team members and other stakeholders to ensure effective collaboration and information sharing.
- ❖ Monitor project progress, identifying any issues or delays, and propose adjustments to schedules or strategies as necessary.
- ❖ Oversee the procurement of resources and materials, ensuring they meet project specifications and are delivered on time.
- ❖ Implement risk management strategies to minimize project risks and prepare contingency plans for potential problems.
- ❖ Facilitate project meetings, including preparing agendas, documenting discussions, and tracking action items.
- ❖ Evaluate project outcomes against initial objectives and criteria, providing detailed reports on findings and recommendations for future improvements.
- ❖ Support the project manager in contract administration, ensuring compliance with legal and organizational standards and addressing any disputes or variations.
- ❖ Ensuring the meticulous examination and validation of Finishes techniques to maintain high construction standards.
- ❖ Rigorously certifying vendor bills to uphold financial transparency and adherence to contractual agreements.
- ❖ Conducting regular meetings with stakeholders to address concerns, provide project updates, and ensure alignment with overall objectives.
- ❖ Exercising precise document control for project drawings and Standard Operating Procedures (SOPs) to streamline communication and maintain project integrity.
- ❖ collaborating closely with architects and consultants to resolve technical challenges, ensuring the smooth progression of construction

LARSEN & TOUBRO WORK EXPERIENCE

Senior Fishing Engineer (09.2017-06.2024)

Achievements/Tasks

- ❖ Ensuring the meticulous examination and validation of Mivan shuttering techniques to maintain high construction standards. Overseeing the seamless execution of waterproofing procedures, ensuring the durability and longevity of structures.
- ❖ Efficiently coordinating with Mechanical, Electrical, and Plumbing (MEP) teams to synchronize activities for optimal project progress. Rigorously certifying vendor bills to uphold financial transparency and adherence to contractual agreements.
- ❖ Diligently managing and implementing amendments to work orders, ensuring accurate and updated project documentation. Methodically selecting construction materials based on project specifications, performance, and sustainability criteria.
- ❖ Conducting regular meetings with stakeholders to address concerns, provide project updates, and ensure alignment with overall objectives.
- ❖ Exercising precise document control for project drawings and Standard Operating Procedures (SOPs) to streamline communication and maintain project integrity.
- ❖ Scrutinizing estimated quantities for bills and manpower requirements, ensuring accuracy and cost-effectiveness in project planning.
- ❖ Collaborating closely with architects and consultants to resolve technical challenges, ensuring the smooth progression of construction activities.

LARSEN & TOUBRO WORK EXPERIENCE

Structure Engineer (06.2014-09.2017)

Achievements/Tasks

- ❖ Specialized in overseeing the final touches of the project, ensuring that each flat met the highest standards of quality and aesthetics.
- ❖ Responsible for the smooth handover of 183 flats to customers, emphasizing a commitment to delivering excellence in the final product.
- ❖ Conducted rigorous process checks, provided training to the site team, and organized pre-construction meetings to ensure alignment with project goals.
- ❖ Collaborated with the Project Management Consultant (PMC), organized and coordinated pre-construction meetings, and provided technical assistance to the site team.
- ❖ Played a crucial role in reviewing drawings, liaising with structural and architectural consultants to guarantee accuracy and compliance.
- ❖ Assumed responsibility for ensuring work adherence to method statements and material submittals, maintaining project standards.

PROJECTS WORKED ON

➤ Project-5: CAMFFIMS Project on Deputation Senior Engineer (08/2023 -06/2024)

- ❑ **Description**-Seconding to the Comprehensive Assessment and Management Framework for Integrated Monitoring Systems (CAMFFIMS) Project at Larsen and Toubro Construction, assuming the role of a Senior Engineer. In this capacity, my responsibilities extend to crucial aspects of project management, technology implementation, and team coordination.
- ❑ **Technology Integration**: Playing a pivotal role in the integration of cutting-edge technologies within the project framework. This includes evaluating, selecting, and implementing monitoring solutions aligned with industry best practices.
- ❑ **Team Leadership**: Providing leadership to a dedicated team, ensuring seamless collaboration and adherence to project timelines. Responsibilities include resource allocation, performance monitoring, and fostering a collaborative work environment.
- ❑ **Stakeholder Coordination**: Actively coordinating with internal and external stakeholders, including clients, consultants, and project management teams. This involves regular communication to align project objectives with organizational goals.
- ❑ **Quality Assurance**: Implementing robust quality assurance measures throughout the project lifecycle. This includes conducting regular audits, assessments, and feedback sessions to maintain the highest standards of project delivery.
- ❑ **Adaptability and Innovation**: Demonstrating adaptability and innovation in addressing emerging challenges within the project. This involves staying abreast of industry trends and technological advancements to enhance project efficiency.
- ❑ **Strategic Decision-Making**: Participating in strategic decision-making processes, contributing valuable insights to ensure the successful execution of the CAMFFIMS Project.

➤ Project-4: CIDCO PMAY Projects (04/2022 - 08/2023)

- ❑ **Description**- I have played a pivotal role in completing Mission 96 at the Kharkopar site under the CIDCO PMAY Projects. This mission involved the construction of 96 flats within an impressive timeline of 96 days, showcasing the efficiency and dedication of our project team. I held the position of Finishing Senior Engineer and am responsible for overseeing the completion of six towers.
- ❑ **Construction Technologies**:
 - ❑ **Cementitious & PU Waterproofing**: Implemented waterproofing solutions in critical areas such as toilets, refuges, and terraces, utilizing cementitious and polyurethane (PU) waterproofing techniques. This ensures the durability and resilience of these spaces against water damage.
 - ❑ **Tiling & Stone Work**: Overseeing the meticulous application of tiling and stone work to enhance the aesthetic appeal and functionality of the living spaces.
 - ❑ **Fire-Rated Metal & Wooden Doors**: Ensured the installation of fire-rated doors, both metal and wooden, to meet safety standards and enhance the overall fire resistance of the buildings.
 - ❑ **Gypsum & Painting Works**: Managing the application of gypsum for interior finishes and coordinating the painting works to achieve a high-quality and visually appealing final product.
 - ❑ **Advanced Construction Technology**: Door are two types of wooden & metal doors both are fire rated 1 hrs & two hours and nonfire rated.
 - ❑ **Interior Work** : Like Kitchen Cabinets

Project-3: Island City Center Project, Dadar East – Tower Management and Quality Excellence (08/2017 - 03/2022)

- ❑ **Description**- Center project in Dadar East. Managing one tower comprising 56 floors and 183 flats, my role was instrumental in ensuring the seamless completion and handover of residential units. Facilitating the transfer of residential units to clients and the Project Management Consultancy (PMC) team.

- ❑ **Working Technologies:**
- ❑ **Drywall System (Saint Gobain):** Implemented a well-designed drywall system for interior partitions, enhancing both aesthetics and functionality.
- ❑ **Flooring Expertise:** Applied wooden flooring, Italian marble work, engineering marble, and meticulous tiling works to achieve high-end finishing.
- ❑ **Doors and Cabinetry:** Installed fire-rated metal and wooden doors, interior kitchen cabinets, and carried out gypsum work and metal & gypsum false ceiling works.
- ❑ **Waterproofing Solutions:** Executed PU & cementitious waterproofing methods to ensure the longevity and durability of critical areas.
- ❑ **Versatility in Finishing:** Demonstrated versatility in high-end finishing, with additional exposure to glass facade works, showcasing a broad spectrum of skills.
- ❑ **Advanced Construction Technology:** Door are two types of wooden & metal doors both are fire rated 1 hrs & two hours and nonfire rated.
- ❑ **Interior Work:** Like Kitchen Cabinets

PROJECTS WORKED ON

➤Project-2: GHB Mass Housing Projects – RCC Structure Engineering Excellence (09/2015 - 08/2017)

- ❑ **Description-** Served as an RCC Structure Engineer for the GHB Mass Housing Projects, where my focus was on managing two towers, each with G+14 floors.
- ❑ **Role as RCC Structure Engineer:** Spearheaded the structural engineering aspects for two towers, ensuring the integrity and stability of the construction.
- ❑ **Process Oversight and Training:** Assumed responsibilities for overseeing processes, providing training to the site team, and ensuring that work executed on-site adhered to the highest quality standards.
- ❑ **Pre-Construction Meetings:** Organized and led pre-construction meetings, fostering effective communication and coordination among the project team to align efforts with project objectives.
- ❑ **Client Coordination:** Collaborated closely with the client, maintaining open lines of communication to address concerns, provide updates, and ensure alignment with project expectations.
- ❑ **Technical Assistance:** Provided critical technical assistance, leveraging my expertise in RCC works to resolve challenges and optimize construction processes.
- ❑ **Structural Stability:** Successfully ensured the structural stability and integrity of the two towers, meeting or exceeding industry standards.
- ❑ **RCC Expertise:** Applied in-depth knowledge of Reinforced Concrete (RCC) techniques in the construction of both towers, emphasizing safety and durability.

➤Project-1: RIL J3 Polymer Control Center - Diligent Supervision and Quality Assurance (08/2014 - 09/2015)

- ❑ **Description-** Played a crucial role in overseeing and managing the construction of the RIL J3 Polymer Control Center, focusing on a single tower.
- ❑ **Coordination and Direct Supervision:** Actively coordinated and directly supervised all activities related to field tests in collaboration with the Client team. This involved ensuring seamless communication, effective collaboration, and timely execution of testing procedures to meet project requirements.
- ❑ **Quality Assurance Meetings:** Conducted regular quality assurance meetings to uphold and enhance construction standards. These sessions were dedicated to fostering a culture of quality consciousness among the project team, addressing concerns, and implementing corrective measures to maintain high-quality outcomes.
- ❑ **Safety Awareness Meetings:** Led safety awareness meetings, emphasizing the importance of adherence to safety protocols and procedures. This proactive approach aimed to create a safety-conscious work environment, minimizing risks and promoting the well-being of the project team.
- ❑ **Construction Meetings:** Organized construction meetings to streamline project activities, discuss progress, identify potential challenges, and implement effective solutions. These meetings served as a platform for open communication, promoting collaboration among team members.
- ❑ **E7cient Field Test Execution:** Successfully coordinated and supervised field tests with the Client team, ensuring accuracy, reliability, and compliance with project specifications.
- ❑ **Quality and Safety Compliance:** Contributed to the implementation of quality and safety measures through regular awareness meetings, resulting in a construction environment that prioritized excellence and the well-being of the project team.
